Several-use non-woven disposable pillow cases: These can each be used a number of times to reduce the frequency of laundering Sleep-Safe pillows. They are made from soft, flame retardant non-woven material which is comfortable and hygienic, and laboratory tests show they don't affect the anti-suffocation properties of Sleep-Safe pillows to any significant extent. They are ideal for use during respite stays or where frequent bedding changes are required due to dribbling, excessive salivation or skin shedding.
